

## How to switch programs on the XDS Pro-4 using Serial Commands

Every Program transmitted via the XDS satellite system is associated with a Program ID that identifies the program to the receiver. Individual programs may be selected to the receiver's output ports by issuing serial ID commands via the M&C (Console) Port on the back of the receiver, thereby changing the program that the receiver is decoding.

If a program is selected for decoding using this method that is **NOT** part of the station's list of authorized programming, **it will NOT be decoded**. Only programs authorized for the station that the receiver is assigned to can be decoded. Whenever possible, always use the XDS Port Scheduler as your main method of taking a program to ensure you receive the proper content.

You can command the receiver as follows:

- 1) Start a terminal session (using HyperTerminal or equivalent) by connecting to the receiver's M&C (Console) Port. The default settings for this Port are **115200, 8, None, 1**.
- 2) Hit Enter. You should see a "Hudson" prompt.
- 3) Log in by typing **LOGIN(space)TECH(space)RADIO**
- 4) Login confirmation will be displayed ('You are logged in as TECH')

Once you are logged in, the command to steer a Port on the receiver to a specific program PID is:

**PORT(space)LIVE,(Port),ID**

Examples:

**PORT LIVE,A,18** – This command will set Port A to Program ID **18** (ESPN MLB1)

**PORT LIVE,B,33** – This command will set Port B to Program ID **33** (ESPN NBA1)

Please refer to the PID table listed below for the Program ID assignments for each program available on the Citadel / ABC XDS receiver.

**IMPORTANT:** Program schedules set in the web-based XDS Program Scheduler will override any manual ID changes.

To change the baud rate on the M&C (Console) Port, do the following:

- 1) Log in to the receiver as described above
- 2) Enter **BAUD(space)(desired baud rate)[ENTER]**

Example: to set the baud to 9600, enter **BAUD 9600 [ENTER]**

**Listing of available programming on the Citadel / ABC XDS receiver  
with associated Program IDs:**
